

HOW CAN A CHART REVIEW BENEFIT YOUR PRACTICE?

REIMBURSEMENT FOR SERVICES RENDERED SOUNDS EASY, DOESN'T IT?

Chart reviews are a necessity to assuring that your practice is compliant and maximizing revenue for the services rendered.

OVERVIEW

Our Certified Professional Medical Auditor (CPMA®) healthcare consulting team are extensively trained, HIPPA compliant, and committed to accuracy and excellence.

Our comprehensive chart review will improve the quality of your clinical documentation in electronic medical records, which will lead to accurate claims, ensuring you receive the reimbursement you deserve. We recommend performing regular chart review to establish compliance with regulatory guidelines and ensure you are managing an efficient and clean operation.

THE EDAFIO CHART REVIEW PROCESS

Recent statistics

show that 42% of

Medicare Claims

for E/M services

were coded

incorrectly.

WHY SHOULD WE DO THIS?

Help identify lost revenue

Identify cloning of notes and code overuse

Determine if documentation supports the service that was billed

Identify areas of opportunity for improvement and training within the organization

Identify any outliers before large payers find them and request an internal audit to challenge inappropriate coding

Help protect organizations against unintentional fraudulent claims and billing activity

Failure to validate your provider's coding & documentation puts your organization at risk

COMMON FINDINGS DURING A CHART REVIEW INCLUDE:

Cloning of notes

Upcoding or downcoding

Incorrect use of modifiers

Missed revenue opportunities

Over reporting of specific E/M codes

Overdocumentation due to improper use of EMR templates

Documentation that does not support the patient's chief complaint

Reporting of E/M codes that equal up to more time than the provider is physically in the office

PROVIDER PACKAGE INCLUDES:

- Ten patients per provider
- Set up with access to EMR
- Review three notes per patient
- Research time
- Write up report/review findings with staff
- Provide comprehensive documentation on each chart note reviewed that consists of findings and recommendations
- Discuss the findings of the chart reviews in detail

\$1500 per provider to cover level of effort start to finish
